

## HOOKIPA Pharma To Report Third Quarter 2019 Financial Results on November 12, 2019

November 4, 2019

NEW YORK and VIENNA, Austria, Nov. 04, 2019 (GLOBE NEWSWIRE) -- HOOKIPA Pharma Inc. (NASDAQ: HOOK, 'HOOKIPA'), a company developing a new class of immunotherapeutics targeting infectious diseases and cancers based on its proprietary arenavirus platform, will announce financial results for the third quarter ended September 30, 2019 on Tuesday, November 12, 2019, after the NASDAQ market close.

The Company will not be conducting a conference call in conjunction with this earnings release. Until otherwise noted, the Company will only conduct an earnings conference call in conjunction with its fourth quarter earnings releases.

### About HOOKIPA

HOOKIPA Pharma Inc. (NASDAQ: HOOK) is a clinical stage biopharmaceutical company developing a new class of immunotherapeutics, targeting infectious diseases and cancers based on its proprietary arenavirus platform that is designed to reprogram the body's immune system.

HOOKIPA's proprietary arenavirus-based technologies, VaxWave<sup>®\*</sup>, a replication-deficient viral vector, and TheraT<sup>®\*</sup>, a replication-attenuated viral vector, are designed to induce robust antigen specific CD8+ T cells and pathogen-neutralizing antibodies. Both technologies are designed to allow for repeat administration while maintaining an immune response. TheraT<sup>®</sup> has the potential to induce CD8+ T cell response levels previously not achieved by other published immuno-therapy approaches. HOOKIPA's "off-the-shelf" viral vectors target dendritic cells in vivo to activate the immune system.

HOOKIPA's VaxWave<sup>®</sup>-based prophylactic cytomegalovirus vaccine candidate is currently in a Phase 2 clinical trial in patients awaiting kidney transplantation from living cytomegalovirus-positive donors. To expand its infectious disease portfolio, HOOKIPA has entered into a collaboration and licensing agreement with Gilead Sciences, Inc. to jointly research and develop functional cures for HIV and Hepatitis B infections. HOOKIPA is building a proprietary immuno-oncology pipeline by targeting virally mediated cancer antigens, self-antigens and next-generation antigens.

TheraT<sup>®</sup> and VaxWave<sup>®</sup> are not approved anywhere globally and their safety and efficacy have not been established.
